AMAJUOYI UDOCHUKWU DEBORAH

Senior Product Designer and Product Manager | AI Builder

Germany (Open to Relocation) | deborahprecious48@gmail.com | +49 151 2498 2621 | amajuoyideborah.com | LinkedIn

PROFESSIONAL SUMMARY

Senior Product Designer and Product Manager with experience across B2B, B2C, D2C and platform products. Designs and ships digital products for Volkswagen Group that serve four brands: Volkswagen, Škoda, SEAT and CUPRA. Led the move of all four brands to a new design system version, brought them in line with EU accessibility standards, and kept the team on board throughout. Takes unclear briefs through research, design and delivery, sets the product strategy behind them, and builds working prototypes in Figma or with AI tools when an idea needs testing.

CORE SKILLS

- **Design:** UX and UI Design, Interaction Design, Design Systems, Accessibility (EU Standards), Prototyping in Figma, Systems Thinking.
- **Research & Metrics:** Qualitative and Quantitative Research, Usability Testing, Conversion and Retention, Data Informed Decision Making.
- **Product Strategy & Delivery:** Product Lifecycle Management, Roadmap Prioritization, Opportunity Framing, Go to Market Strategy, MVP Definition, Agile and Scrum.
- **Leadership & Communication:** Executive Storytelling, Engineering Alignment, Technical Tradeoffs, Stakeholder Management, Workshop Facilitation.
- **AI Skills:** Generative AI Workflows, Model Context Protocol (MCP) Integrations, LLM APIs, Building with AI Coding Tools.
- **Tools:** Figma, FigJam, Framer, Miro, Adobe Creative Cloud, Jira, Confluence, Cursor, Claude Code, Claude, OpenAI API, GitHub.

PROFESSIONAL EXPERIENCE

CARIAD (Volkswagen Group Company) | Germany

Senior Product Designer and Product Manager | *Sep 2025 to Present*

- Lead product strategy, prioritization and delivery for connected vehicle digital experiences, including enrollment and onboarding, across Volkswagen, Škoda, SEAT and CUPRA, four brands that together delivered more than 6 million vehicles in 2025.
- **Design Systems:** Keep cross platform component frameworks growing, which shortens design to development handover and keeps every brand consistent.
- **Discovery:** Turn user research and platform analytics into clear product requirements when the starting brief is vague.
- **Roadmap Ownership:** Take initiatives from discovery to release across the four brands, keeping MVP scope tight so teams ship sooner.
- **Engineering and Leadership Alignment:** Work with engineering leads and executive stakeholders to balance technical constraints against business priorities and agree where distributed teams focus.
- **AI in Practice:** Use Claude Code, Cursor and Figma plugins in everyday product work to prototype and test ideas quickly before engineering commits.

CARIAD (Volkswagen Group Company) | Germany

Senior Product Designer | *Sep 2023 to Sep 2025*

- Led experience strategy, interaction patterns and the shared design system for Volkswagen Group automotive software.
- **Design System Migration:** Migrated all four brands to Design System 6 and standardized core components. When brands each wanted different features, introduced a white label Generic Design System screen first, with brand customization starting only after approval, and agreed with engineering to split the code so one brand's feature never breaks the shared structure.
- **Accessibility:** Delivered accessibility work across the four brands to meet EU accessibility standards, guiding the team through both the migration and the new requirements.
- **Working with Engineering:** Led discovery sessions and set usability testing protocols that reduced developer rework.
- **Prototyping:** Built detailed Figma prototypes and designed flows for primary and guest users within the shared design system.

HEXAD GMBH (for Volkswagen Group) | Germany

Lead Product Designer / Product Lead | *Mar 2022 to Aug 2023*

- Led product design and feature delivery for Volkswagen Group mobility software across Volkswagen, Škoda, CUPRA and SEAT.
- **Discovery and MVP Framing:** Ran user interviews and workflow analysis to find where users got stuck, shaping opportunities that increased feature adoption.
- **Agile Delivery:** Worked with Product Owners to map user journeys and test detailed prototypes in quick usability rounds.

FLUIDANGLE | California, United States

Lead Product Designer & Product Manager | *Jan 2020 to Feb 2022*

- Owned B2B and B2C software products for small and medium businesses from concept through launch.
- **Simplifying Workflows:** Turned complex legal and administrative requirements into clear product backlogs, shortening the time users needed to complete key tasks.
- **Product Growth:** Managed the full product lifecycle and launched products that improved user retention and grew adoption across regional markets.

SELECTED PROJECTS

- **KlaDot (published UX case study):** Designed a digital banking app for mobile.
- **EvalSpree (evalspree.com):** Building an AI evals tool that helps product managers test the AI features they ship, with human review built in. Reviewers can save a disagreement with the AI judge as a correction example, and in a real test one saved correction lifted the pass rate from 59% to 68% by clearing the judge's false alarms, while it still caught every invented detail. A trust check blocks launch approval when the judge is not reliable. Built with Cursor and hosted on Vercel, after hands on testing of Braintrust, Confident AI and Evidently.
- **Apple Notes Transcriber (open source):** Built a Swift command line tool with Cursor that sends existing audio files to the OpenAI Whisper API and saves the transcript in Apple Notes, closing a gap Apple Notes leaves open. View on GitHub
- **MCP Integrations:** Connected Cursor to Figma, Framer and GitHub through Model Context Protocol (MCP), so the AI assistant works directly with design and code tools.
- **Reversal (published case study):** Product case study on an autonomous home robot, covering market sizing, memory architecture, a phased go to market plan, risks and success metrics.

MENTORSHIP, TEACHING & COMMUNITY

- **AI and Design Workshop:** Led a live workshop on AI and design attended by more than 150 people.
- **Global Mentor | ADPList:** Mentor product and design professionals around the world on product strategy, career growth and explaining product decisions.
- **Design School Instructor | Utiva:** Taught and assessed student cohorts in product design, information architecture and execution.
- **Team Lead Mentor | WomenTech Inspire:** Guided a cohort of mentors from different disciplines and supported the community's growth.
- **Community Leader | IxDA Lagos:** Led international knowledge exchange initiatives and spoke on design thinking at World Interaction Design Day.

EDUCATION & CERTIFICATIONS

- **M.Sc. Information Technology** | American Intercontinental University
- **B.A. Purchasing and Supply** | Federal Polytechnic Nekede Owerri
- **Certifications:** Product Design and Product Masterclasses, Product School
- **Awards:** Peer Reviewer (IxD 24 Awards), Staff of the Year (Fluidangle)
